

Cayman Islands Survey – Health Insurance for Senior Citizens

The Health Insurance Commission at the Department of Health Regulatory Services of the Cayman Islands is undertaking a feasibility study for a Standard Health Insurance Contract (SHIC) for persons age 65 and older. The current SHIC establishes the minimum level of benefits that must be covered by a health insurance policy sold in the Cayman Islands. More details on the current SHIC can be found in Schedule 1 of the Health Insurance Regulations (2017 Revision) [Click here for more information](#)

The survey is open to all persons (and not just to Senior Citizens).

This survey is being conducted by the healthcare consulting firm Morneau Shepell which has been engaged by the Health Insurance Commission to undertake the feasibility study.

Your views are important to help with the analysis and this survey is intended to gather your input. If there are **other members in your household** who wish to provide input, they **should separately complete this survey**. Please be assured that all the survey data and information collected by Morneau Shepell will be held in strict confidence and your responses will remain anonymous.

We thank you for your participation in the survey. The survey is estimated to take approximately 15 minutes to complete.

This survey may be completed on a desktop, mobile device or tablet. If you are unfamiliar with the internet, you may wish to have someone assist you to complete this survey online. If you prefer to complete the survey in paper form, you can request a copy of the survey at a District Health Clinic, a Hospital, the Government Administration Building, the Seafarers Hall, or at other government service centres.

Important Dates

The closing date of the survey is **Sunday April 15, 2018**.

22. If a Standard Health Insurance Contract (SHIC) for persons age 65 and over were to include additional services and insurance protection but it leads to a higher premium rate, how much more than your current premium rate would you be willing to pay for health insurance?

- Less than a 5% increase
- An increase between 5% and 10%
- An increase between 10% and 15%
- An increase between 15% and 20%
- An increase over 20%

23. What are the factors that prevent you from seeking medical care? Choose those that apply most often.

You may select multiple items.

- The service is covered by my health insurance but I don't wish to pay the co-pay
- I have reached the limits under my health insurance policy and I don't wish to pay for the service
- The service is not covered by my health insurance
- I can't afford the service
- I can't get a referral for the service
- I don't know how to access the service
- The service is not offered in the Cayman Islands

24. In general, a principle under health insurance is to pool persons together so that healthcare claims are spread amongst the participants in the risk pool.

Please choose the statement that best fits how you would wish the health insurance system to operate:

- 1. All persons no matter their health condition, age or gender should pay the same premium rate
- 2. Similar to 1 above, even if it means that I pay a premium rate higher than I might otherwise have paid
- 3. Persons that are known or anticipated to have high claims should pay a higher premium rate
- 4. High risk persons should be placed in a separate insurance pool
- 5. Similar to 4 above, except I'd be willing to pay towards the high risk pool so that these high risk persons can afford health insurance
- 6. No rules should apply to premium rates, health insurers should compete on premium rates and "the market will decide"
